

Get a Grip!

We challenge you to an instrument tug-of-war. Order our Matrix Forceps (remember, there's a 6 month money-back guarantee) and do a tug-of-war test with your current instrument. If you are not completely convinced that our Matrix Forceps are a better way to place and remove matrix bands, send them back for a full refund!

Matrix Forceps - Pull Strength Chart

Testing was performed using a pull force gauge with .0013" matrix material. Each forceps was tested for 10 pulls, with the average force shown in the chart below.
